SMART VIRTUAL BUILDING

**SMART
BUILDING**

SMART BUILDING MANAGEMENT

SMART ASSET MANAGEMENT

Enables the creation of a single repository and a global knowledge base of assets shared by all departments

SMART PROPERTY MANAGEMENT

Rental and financial management of your properties, as well as monitoring the operation of your rental real estate assets.

SMART COMERCIAL MANAGEMENT

Management of marketing activities from the prospecting phase through to the contracting phase

SMART CONSTRUCTION MANAGEMENT

SMART GED

full-web collaborative platform for managing plans and documents

SMART PROJECT

A project management platform designed to meet all the needs of stakeholders throughout the life cycle of a construction or development project (design phase / works phase and execution / delivery phase).

SMART Quality Building

Module for managing the lifting of your reservations, enabling you to manage non-conformities on site during the acceptance and warranty phases.

SMART Tenders

Enables you to collaborate with your business partners and centralize your tender documents.

SMART FACILITY MANAGEMENT

SMART FM

Curative and preventive maintenance of real estate assets, to manage claims from property operators.

SMART BIM

View and analyze your 3D digital model (IFC files)
Interoperability of BIM data with facility management to facilitate forecasting, logistics, planning and operations.
